

Annual Report 2023

For over 20 years, we have applied our capabilities in an inspiring journey of growth and development. As pioneer foundation at the national level, we have made every effort to achieve advanced levels of human development for our societies, emphasizing that the advancement of human being is the boost of our permanent movement in **"Al-twasul For Human Development "**

20 years
in human development

About us

Altwasul for Human Development is a Yemeni NGO established in 2004. It's work is focused on several humanitarian fields, including food security and agriculture, health and nutrition, education, Water, Sanitation and Hygiene (WASH), protection, shelter, capacity building, livelihood skills and community care throughout the Yemen governorates. Since establishment, Atwasul for Human Development has been contributing to anti-poverty programs and capacity building of poor and the most vulnerable groups through a series of specific projects and programs in partnership and cooperation with the Yemeni government, Civil Society Organizations (CSOs) and international organizations and bodies Altwasul for Human Development was able to establish itself as a leading organization in the field of humanitarian and sustainable development by receiving the international quality accreditation (ISO 9001:2015).

Our Vision

Pioneer in humanitarian action and creation of productive human beings

Our Mission

A Yemeni humanitarian and development foundation that adopts qualitative programs to help people in need live decent lives and become active members of society in compliance with international humanitarian standards, using an institutional system and successful partnerships

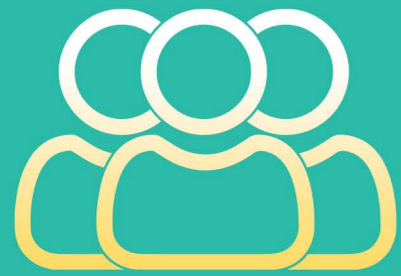

Our Objectives

- Contributing to improving Yemeni society in health, community care, educational, cultural, and professional development.
- Participating in the development of remedies to society's poverty problem.
- Supporting and empowering productive households in society.
- Collaborating with similar bodies, institutions, associations, and organizations in compliance with the law

The highest goal we have set in **Altwasul for Human Development** is to create a future called the Human, emphasizing that creating societies is founded on building the human being, in which we inspire and lead generations that know no borders for ambitions.

With your support,

1,234,384

beneficiaries

have benefited from our humanitarian and development activities and interventions.

Opening:

CEO
Raed Ibrahim Qassem

Another year towards achievement...

It's our great pleasure, at Altwasul for Human Development, to incorporate another year's work and accomplishments in this report. The year 2023 saw the implementation of a package of quality programs and projects in various priority humanitarian sectors, particularly health and education, where interventions contributed directly to the support and recovery of these two pivotal sectors' service infrastructures. Since Altwasul for Human Development takes an innovative approach to providing services and humanitarian solutions, the shelter sector saw an unprecedented initiative represented by integrated residential village projects as a safe and sustainable alternative to sheltering displaced families within the governorates experiencing waves of displacement.

We, at Altwasul for Human Development as well, are proud to announce the renewal of our ISO 9001:2015 accreditation for excellence in humanitarian projects provision. Meanwhile, we continue to follow the best standards and procedures in this industry. Quality of service is not only a top priority; it is a fundamental value inherent in Altwasul for Human Development, and our unwavering devotion to it supports our team's great performance in various sectors and fields.

We are delighted to emphasize our unwavering commitment to being an inspiring and promising institution with promising growth prospects and strategic partnerships with donors in the State of Kuwait, UN agencies as well as a number of international organizations, all of which are supported by a highly talented and competent team, considering this the reasons behind institutions' success and prosperity. All gratitude and admiration to all supporting and cooperative partners, and all relevant parties, who contributed to the continuation of Altwasul for Human Development's projects and humanitarian interventions.

Shelter >

Altwasul interventions in shelter sector contributed to improving the conditions of IDP. These interventions devoted effort to provide valuable humanitarian action which actually marked by improvement, development and innovation, taking into account securing a decent life and adequate housing for the IDPs. In an unprecedented endeavor, IDPs at the residential villages were able to address their concerns and create new solutions that contributed directly to more sustainable solutions..

Opening of Mansour Al-Khulaifi Residential Village - Marib

The great village of Mansour Al-Khulaifi was opened to shelter IDPs in Marib Governorate. The village contains 60 housing units supplied with water tanks and a water network, as well as building and equipping of a mosque, in addition to a 30-meter well with a tower tank,

allowing
60 families
to live
a decent life.

Almost 8,140 beneficiaries of the relief of those affected by the floods of Al Maharah (Teej)

Altwasul intervention in Al-Mahra Governorate came as a rapid response to the humanitarian appeal requested by the local authority for the relief of those affected by Tropical Storm (Teej). 300 shelter kits consisting of mattresses and blankets in addition to basic kitchen appliances were distributed. The project also included the distribution of 6,000 hot food meals and 20,000 bottles of drinking water.

Kuwait Al-Khair Village for IDPs shelter

Al-Mukha District
Taiz Governorate

Kuwait Al-Khair Village contains 120 housing units, a well, a water network for homes and a bakery, network for homes and a bakery,

allowing
120 families
to live in
a decent
life.

Al-Takhi Residential Village for IDPs shelter - Al-Khokha District - Al-Hodeidah Governorate

Food >

Starving and malnutrition represent an obstacle to sustainable development, creating a trap from which people cannot easily escape and leaving people less productive and more vulnerable to disease, which makes it difficult for them to increase their income and improve their livelihoods. Since we aspire to a hunger-free society, our humanitarian interventions have contributed to enhancing food security for the targeted and most vulnerable groups of society. These interventions have ranged from ensuring basic food security to constructing, equipping, and assisting bakeries to providing bread

Food baskets project, through our interventions in food sector, contributed to providing food security for IDPs and affected people in conflict areas.

Kawafil Kuwait Al Rahma Project 2

9,800 Beneficiary

Coincide with the State of Kuwait's national holidays, the Kuwait Al-Rahma 2 project was implemented in Ma'rib Governorate, which included 17 trucks carrying 1,400 food baskets and 600 winter shelter kits, targeting the governorate's largest population of IDPs, funded by Rahma International Charity in Kuwait.

Education >

Education is the gateway to the future, as well as the key to people's rebirth and growth. The crisis in Yemen has resulted in increasing needs in the education sector, which has had an impact on the educational process. Since our aim is to empower people, education comes as a primary emphasis in all of our humanitarian operations and programs. Meanwhile, Altwasul for Human Development, as well, pays attention to the gifted and talented through a program specifically designed to identify and nurture talented individuals, as well as to develop their capacities for future leadership roles.

Al-Rowad Model School – Hadhramaut - Sayoun

We, at Altwasul for Human Development, are committed to improve the education process level by supporting and operating model schools that provide a solid pedagogical foundation for our students' success. We hope this could empower kids and improve their educational routes, allowing them to make a positive difference in their community. We seek to cultivate a generation of leaders and innovators who make a tangible contribution to the growth and development of their society.

Supporting the model schools

Building a primary education school in Aden

through the great support of the General Secretariat of Awqaf in the State of Kuwait, and within the “Kuwait is on your side” campaign and to enhance the educational process in Yemen, a model primary education school was built and equipped in Aden Governorate. The school consists of 81 classrooms, administration rooms, a laboratory, and bathrooms, allowing 1,036 male and female students to benefit from this school. The purpose of building this school is strengthen and improve the infrastructure for the educational process in Aden Governorate and reduce crowding in schools

The project of discovering and sponsoring talented within the governorates of Hadhramaut - Aden – Taiz

310
talented

This project aims to identify the exceptional talented and create an atmosphere that will support their growth. For those talented in a variety of disciplines, the program offers specialized training, mental stimulation, and one-to-one support.

Maharati Project

to qualify youth for labor market

Almost 1,860 young men and women were empowered with the essential training skills to enter the labor market. This project is not just an opportunity, but it will establish a bright future and attain financial independence for these young people in Aden, Taiz, Hadramout, Marib, and Shabwa.

Children Psychological Support Project

We, at Altwasul for Human Development, pursue to provide psychological support for the children who have no breadwinner. This can be done through various programs of educational and entertainment activities and provision of child-friendly spaces for purpose of building their capacities, developing their skills, strengthening the social relationship, enhancing the child confidence and emotional connection of children within the governorates of Aden, Taiz, Sana'a, Marib and Hadhramaut.

5,816
Beneficiary

Construction of Edris Model School

In response to urgent educational needs and within the framework of cooperation and partnership with the government sector represented by the Ministry of Education, "Altwasul for Human Development" has built and equipped Edris Model School, which includes 21 classrooms, a laboratory, and administration and educational facilities with a capacity of 024 students. The project contributes to meeting the increasing need for classrooms and school facilities to accommodate the number of students due to the increasing waves of displacement in Marib Governorate.

Economic > empowerment

Empowerment, as understood, is the provision of essential tools and procedures to beneficiaries of the social services system to be assisted in becoming self-sufficient and integrated into the job market. As a result, the economic empowerment sector has received attention, focus, and increasing expansion in the map of our interventions through a package of development programs and projects that have directly contributed to mobilizing labor and production forces and engaging in the wheel of economic growth.

Fishing Boats Distribution Project

16 of affected fishermen households benefited from our project through distributing 16 boats among those households, so they earn and improve their livelihood under the slogan "Do not give me fish, but teach me how to fish".

148
beneficiaries

Livelihood Improvement Project (9 Cargo Electric Trike) 64 beneficiaries

About 64 beneficiaries have benefited from this project through supplying, installing and distributing 9 Cargo Electric Trike for poor and low-income families to contribute to their economic empowerment, allowing them to live decently.

Livelihood Improvement Project

700

Beneficiary

This project is focused on supporting farmers to plough and cultivate their lands by owning manual tractors to facilitate their work and save the cost of ploughing their lands, and increase their production, considering this the most important economic empowerment projects implemented by Altwasul.

Halal Earning Project

The creation of productive human is Altwasul's vision, which seeks to contribute to the development industry and achieve social renaissance by creating job opportunities and providing income sources for the poor and low-income people, allowing them to become self-sufficient without relying on aid.
